**Australian Centre for
International Agricultural Research**

**LIST OF DEPARTMENTAL FILES
CREATED BETWEEN 1 JANUARY 2022 AND 30 JUNE 2022**

Table of Contents

Australian Centre for International Agricultural Research (ACIAR)	3
Research Programs	3

Australian Centre for International Agricultural Research (ACIAR)

Research Programs

- AGB2022113 Evaluating alternative approaches to sector development in Pacific Island Countries
- AGB2022114 Digital monitoring of VietGAP compliance, quality, logistics and handling and retail point of sale compliance (to specifications) with feedback to producers and their producer groups in Vietnamese horticultural value chains
- CLIM2022107 Facilitating manure-based circular agri-food-energy systems for climate co-benefits in the Pacific
- CLIM2022108 Supporting the Tracking Learning Sharing Platform of the Adaptation Research Alliance
- CLIM2022109 Using carbon markets to drive multiple benefits for PNG coffee farmers
- CLIM2022136 Preparing Pakistan for a water scarcity tipping point
- CLIM2022137 Opportunities for the Lao-China railway to drive 'green' agricultural development
- CLIM2022138 The role of research given the political economy of peatlands governance
- CLIM2022140 Integrating multiple climate benefits into community-led greening in East Africa
- CROP2022110 Disease-resilient and sustainable cassava production systems in the Mekong region
- CROP2022111 Intercropping for resilient crop production in Bangladesh and India
- CROP2022112 Village-based biological control of Fall Armyworm in Zambia
- CS2022150 CGIAR-ASEAN Research for Development - Scoping phase
- FIS2022119 Pursuing more inclusive engagement in agri-food value chains by better understanding the roles and challenges facing people of diverse sexual orientation, gender identity and/or expression in Samoa
- FIS2022120 Pacific young (18-21 years) people co-creating healthy and sustainable food futures - using citizen-science to develop youth capabilities to advocate for food environment change agendas in Fiji and the Solomon Islands
- FIS2022121 Responding to Pacific food system challenges for human nutrition outcomes in Timor Leste, Kiribati, Solomon Islands and Vanuatu
- FIS2022147 Supporting emerging climate-smart oyster and seaweed mariculture enterprises in disadvantaged coastal communities in Fiji and northern Australia
- FIS2022148 Addressing key technical bottlenecks in the grouper supply chain in Vietnam and Australia through manufactured feed and hatchery developments that aim to improve sector profitability
- FST2022122 Management of Pests and Diseases of Forest Crops in Ethiopia
- FST2022123 Bangladesh Sundarbans Ecosystem Management
- FST2022124 Developing Nut Industries in Bougainville

- HORT2022125 Smarter use of pesticides in tree crop systems in Philippines and Indonesia for reduced fruit loss and improved safety.
- HORT2022126 Integrating cocoa into productive farming systems in PNG and Bougainville for livelihoods and health.
- HORT2022127 Scoping for the implementation of plant health support in Timor Leste
- HORT2022159 Preparedness and management of huánglóngbìng (Citrus greening disease) to safeguard the future of citrus industry in Australia, China and Indonesia. Phase 1
- HORT2022160 Preparedness and management of huánglóngbìng (Citrus greening disease) to safeguard the future of citrus industry in Australia, China and Indonesia. Phase 1
- LS2022132 Integrated and sustainable antimicrobial surveillance networks in the Pacific (ISARN)
- LS2022133 Strengthening Pacific bee-keeping industries for improved production and livelihoods in PNG, Solomons Islands and Vanuatu
- LS2022143 Operationalizing a Global Animal Health Governance Network for Policy Impact
- LS2022144 Exploring local constructs of 'Resilience' in the face of chronic uncertainty in the drylands
- LS2022156 Understanding One Health zoonotic disease surveillance in Indonesia: a macaque, human and land use change framework
- SLAM2022101 Assessment of the sustainability of CA in rice-based systems in Bangladesh
- SLAM2022102 Creating evidence and designing sustainable agricultural N management strategies to support Laos Green Growth ambitions
- SLAM2022103 Cambodian soil information system supporting sustainable upland agricultural development
- SLAM2022104 Developing information pathways to help assess the biophysical condition, restoration potential and spatial distribution of peatlands across Indonesia - Kalimantan, S Sumatra and W. Papua
- SSS2022116 Mitigating gender-based violence risk in international agricultural research
- SSS2022117 Alternative livelihood options for Indonesian fishers
- SSS2022118 Decolonising food systems through indigenous knowledge exchange
- SSS2022134 Pathways for future farmers in South East Asia
- SSS2022135 Gender inclusive coffee value chains in upland Lao PDR
- SSS2022155 Developing co-management options for sustainable peatlands in Indonesia
- WAC2022128 Water security for locally-relocated coastal communities in the Pacific
- WAC2022129 Current and Projected hydrological trends in the Sundarbans mangrove forest and their impacts on ecology and ecosystem services: A Scoping study
- WAC2022151 Spring water management, Agriculture and resilient livelihoods in the midhills of Nepal

WAC2022152 Climate resilient and adaptive water allocation in Pakistan

WAC2022153 Water for Rice and Fish (WARF): Co-design & piloting of water management interventions for enhanced productivity of rice – fish systems in the Mekong floodplains
