**Australian Centre for
International Agricultural Research**

**LIST OF DEPARTMENTAL FILES
CREATED BETWEEN 1 January 2023 AND 30 June 2023**

Table of Contents

Australian Centre for International Agricultural Research (ACIAR)	3
Research Programs	3

Australian Centre for International Agricultural Research (ACIAR)

Research Programs

- SLAM2023100 Supporting practice change to improve the sustainability of agronomic management in vegetable production systems in Cambodia
- SLAM2023101 Improving the value of smallholder medicinal plant production in North West Vietnam
- SLAM2023102 Assessing where Australia could contribute research to improve soil management in Africa
- SLAM2023103 Building the foundations of a National Soil Strategy in the Philippines
- SSS2023104 Policy-Research Interface Mediation and Enabling (PRIME) Workshop: Climate Adaptation and Inclusive Development in the Agricultural Sector for South Asia
- SSS2023105 Harnessing the Potential of Digital Agri-market Services for Inclusive and Competitive Markets in Cambodia and Lao PDR
- SLAM2023106 Extending findings and transferring knowledge from SMCN2014049 on soil management in slopping lands of Northwest Vietnam and Northern Laos
- SLAM2023110 Enhancing the product quality and productivity of medicinal plant production with ethnic minority women in Vietnam
- WAC2023111 Circular Food Systems in Africa
- WAC2023114 Sustainably scaling up managed aquifer recharge (MAR) to reduce water-related climate risks in the Central Highlands of Vietnam – a practice and policy approach
- WAC2023115 Water Management of Indonesian Lakes Systems
- WAC2023116 Improving water governance in Papua New Guinea
- WAC2023117 Understanding the role of Remote Sensing (RS) in supporting agricultural water management in SE Asia
- WAC2023118 Strategic management of catchments to improve human and ecosystem health in western Pacific countries
- WAC2023119 Water Culture and Governance in the Pacific
- HORT2023121 Strengthening Vietnam’s citrus industry through research collaboration to build industry capacity to meet market demand
- FIS2023122 ‘Planim Fiuja fo Yumi’ - Co-planning Climate-Smart and Equitable Livelihood Futures with Small-scale Fishing Communities through a Participatory and Integrated Approach to Community Engagement.
- FIS2023123 Novel institutions for women’s fisheries in Western Province, Papua New Guinea
- FIS2023124 Valuing traditional knowledge sharing between the Pacific and Northern Australia as a decolonising approach to development: a case study supporting coastal communities to develop and diversify village-based seaweed enterprises

- CLIM2023125 The Pacific CDKN Hub: building brokering capacity to drive climate resilient livelihoods
- CLIM2023126 Supporting Pacific civil society organisations to deliver gender equitable climate finance at the local level
- CLIM2023127 Preparing Vietnam for strategic use of its forests in carbon markets
- CLIM2023128 Communicating adaptation at the research-policy interface in ASEAN
- CROP2023129 Electric and clever: smart mechanisation for smallholders in Cambodia
- CROP2023130 Peanut for Patching Protein Poverty in the Pacific
- CROP2023131 Nitrogen use efficiency: challenges and opportunities for more sustainable cropping
- LS2023132 Moving further towards formalized sheep and goat value chains in Pakistan and Ethiopia through business-oriented breeder and producer groups
- FIS2023133 Sustainable Hydropower in the Mekong: Focusing best-practice technological interventions into dam designs for sustainable fish-based livelihoods
- SSS2023134 Developing an inclusive co-design process for strengthening food security in Western Province, Papua New Guinea
- SSS2023135 Exploring the Role of Farmer Cooperatives in Digital Agriculture in Indonesia and the Philippines
- SSS2023136 Intersectionality and Gender Diverse Climate Change Action in the Pacific: Eliciting a Pasifika-led policy for future engagement
- SSS2023137 Assessing the Social and Economic Implications of Transitioning to Low-Input and Organic Rice Production in Lao PDR
- SSS2023138 Agriculture and Rural Development in Viet Nam since Doi Moi
- SSS2023139 Reframing the yield gap: Integrating farmer knowledge, culture and agroecological conditions for sustainable rice yields in the Philippines.
- SSS2023140 Aligning Innovations with Livelihood Priorities: Understanding the Socio-Cultural and Economic Factors that Shape Technology Adoption in Farming Households in Papua New Guinea
- SLAM2023142 Assessment of soil condition for coffee, pepper and fruit tree production in the five provinces of the Central Highlands of Vietnam
- CROP2023145 High early vigour, high biomass and salt tolerant wheat for Southern Bangladesh
- SLAM2023146 Developing soil knowledge, information and capacity to improve the productivity and sustainability of key cropping systems in Philippines
- HORT2023147 Scoping the opportunity for urban and peri-urban agricultural development in Southeast Asia
- AGB2023148 Enhanced indigenous agribusiness competitiveness through novel ingredients, unique knowledge and cultural attributes in the Pacific
- FST2023149 New, nutrient-rich tree nuts with market potential

- FST2023150 Diversified livelihoods from native tree species in northwest Vietnam
- CROP2023151 Rapid cooking bean varieties for East Africa
- HORT2023152 Improving coffee quality for small landholder growers in the Papua New Guinea (PNG) Highlands
- FST2023153 Sustainable expansion of forestry and wood processing in Laos and Australia
- AGB2023154 Variation to Understanding the drivers of successful and inclusive rural regional transformation: Sharing experiences and policy advice to include a South-East Asian and Pacific country
- AGB2023155 Evidence to underpin Indonesia's agtech transformation
- HORT2023156 Developing banana management and biosecurity for better livelihoods in Pakistan
- CROP2023157 Addressing the rapid emergence of Cassava Witches Broom Disease in Laos
- HORT2023158 Pan Genome Analysis to support innovative utilisation of Coconut Germplasm Resources in the Pacific and South East Asia
- AGB2023159 Achieving smallholder-inclusive, carbon-neutral agriculture in Indonesia using demand-driven approaches
- SSS2023160 Strengthening the research-policy nexus in the Lao PDR for agricultural and rural development
- FIS2023161 Implementing management measures to address the high incidence of Ciguatera poisoning from fish consumption for improved public health and fish export compliance outcomes in Kiribati
- HORT2023163 A pathway for Pacific cocoa to enhance access to the high value craft chocolate market
- FST2023164 Watershed Restoration in Peri-urban Catchments
- HORT2023165 Resilient commercial vegetable production systems for Pacific Island Countries
- AGB2023166 High-Value Agroforestry Value Chain Research to Support Natural Resource Management in Indonesia's Upland Landscapes
- HORT2023167 MeloRisk Australasia: Reducing the risk of exotic root-knot nematodes in Australasia
- WAC2023171 Water Security in South East Asia
- IE2023172 Assessing the impact contributions of a research program on "sustainable crop and livestock farming" in South Central Coast Vietnam
- WAC2023176 Transformative Futures for Water Security – SE Asia Roadmap
- FST2023177 Resource Dependency in the Sundarban ECA
- GMCP2023178 Testing and adapting the Pacific Regional Research Collaborative Framework
- HORT2023179 Strengthening Vietnam's citrus industry through research collaboration to build industry capacity to meet market demand

- WAC2023180 Improving water governance in Papua New Guinea
- CS2023181 Partnering with trading companies to sustainably enhance smallholders' livelihood in the Central Highlands of Vietnam through pilot chain interventions towards high-quality Robusta coffee – An add-on to the V-SCOPE project
- WAC2023182 Transitioning to climate resilient water allocation planning in Pakistan
