

Acknowledgements

This manual is the product of many years of collaboration with colleagues interested in village chicken research and development and village chicken farmers from various parts of the world. Our thanks go to all the people who have worked with us in Bhutan, Cambodia, Ethiopia, Ghana, Indonesia, Malaysia, Mozambique, Nigeria, The Philippines, South Africa, Sri Lanka, Tanzania, Thailand, The Gambia, Vietnam, Zambia and Zimbabwe.

Support provided by the Australian Centre for International Agricultural Research (ACIAR) to assist both authors to conduct research into the control of Newcastle Disease in village chickens is gratefully acknowledged. We wish to acknowledge the support given to our work by the Director and staff of the National Veterinary Research Institute in Mozambique. Special thanks go to Razac Chame for his patience and skill as an artist. In Australia, the authors wish to thank Mrs Leslee Ellis and Ms Sally Grimes. Thanks also go to Dr Mary Young, Ms Elizabeth Bilney and Mr Peter Lynch for assistance with the editing of this manual.

Table of Contents

	<i>Page</i>
Acknowledgements	3
Abbreviations	8
1.0 Introduction	9
2.0 The importance of Newcastle disease in village chickens in developing countries	10
3.0 Characteristics of Newcastle disease	13
3.1 The clinical signs of Newcastle disease (ND)	13
3.2 Post-mortem findings	14
3.3 ND virus classification	15
3.4 Epidemiology	15
4.0 Collection and submission of samples for the diagnosis of Newcastle disease	18
4.1 Tissue samples	18
4.2 Serum samples	19
4.2.1 Blood collection technique	19
4.2.2 Labelling of samples	20
4.2.3 Avoiding haemolysis of samples	20
4.2.4 Storage of sera prior to dispatch	20
4.3 Dispatch of samples	21
4.4 Communication of results	21

5.0	Control of Newcastle disease	22
5.1	Vaccination	23
5.1.1	Eye drop administration	24
5.1.2	Administration via drinking water	25
5.1.3	Administration via feed	26
5.1.4	Administration via injection	26
5.2	Timing of vaccinations	27
5.3	Benefit:cost considerations	28
5.4	Development of ND vaccination campaigns	30
5.4.1	Situation analysis	30
5.4.2	Preparatory phase	31
5.4.3	Recommendations	32
5.4.4	Implementation	32
5.4.5	Monitoring and evaluation	32
5.5	Other control strategies	33
5.6	Control measures during an outbreak	36
6.0	Introduction to live, thermostable Newcastle disease vaccines	37
6.1	The NDV4-HR vaccine	37
6.2	The ND I-2 vaccine	38
6.3	Storage and transport conditions for thermostable ND vaccines	39
6.4	Administration of thermostable ND vaccines	41
6.5	Dilution and use of thermostable ND vaccines	42
6.6	Horizontal spread of thermostable ND vaccine virus	43

6.7	Safety issues	43
6.8	Genetic sequencing of thermostable ND vaccines	43
6.9	Partially thermostable Newcastle disease vaccine — Nobilis ND Inkukhu	44
7.0	Gender aspects of village chicken production and the control of Newcastle disease	46
8.0	Ethnoveterinary knowledge and Newcastle disease	49
9.0	Development of an extension program for Newcastle disease vaccination campaigns	52
9.1	Features of extension for village poultry production	53
9.2	Extension methods	53
9.2.1	Group methods	53
9.2.2	Individual methods	54
9.2.3	Mass methods	55
9.3	Participatory rural appraisal, participatory learning methods and participatory technology development	56
9.3.1	Participatory rural appraisal methods and Newcastle disease	57
9.4	The extension worker	60
9.5	The development of extension programs for village poultry production	62
9.6	Key topics for inclusion in field trial extension activities	63
9.7	Field pre-testing of new extension material	64
10.0	Conclusion	65

11.0	References	66
Appendix 1:	Post-mortem technique for domestic fowls	71
Appendix 2:	Collection of blood from a chicken	78
Appendix 3:	Calibration and care of eye-droppers	81
Appendix 4:	The role of community livestock workers in the control of Newcastle disease	88
Appendix 5:	Comparison of some strains of Newcastle disease virus	92
Appendix 6:	Questions and answers	93
Appendix 7:	Suggestions for a village poultry questionnaire	95
Appendix 8:	Reasons for vaccine failure	103
Appendix 9:	Design and implementation of vaccine trials	104
Appendix 10:	Sources of further information	112

Abbreviations

ACIAR	Australian Centre for International Agricultural Research
CLW	Community Livestock Worker
FAO	Food and Agriculture Organisation of the United Nations
G	Gauge
HI	Haemagglutination Inhibition
I-2	Thermostable, live, avirulent ND vaccine available for local production
INIVE	National Veterinary Research Institute, Mozambique
mL	Millilitre
ND	Newcastle disease
NDV4-HR	Thermostable, live, avirulent, commercial ND vaccine
NGO	Non-governmental organisation
OIE	<i>Office International des Epizooties</i>
PRA	Participatory Rural Appraisal
PTD	Participatory Technology Development
TOT	Transfer of Technology
VETAID	British NGO specialising in community-based livestock development
μL	Microlitre
