OFFICIAL

Dear Lee,

Please see attached design brief, full proposal template and full budget template for your recently approved ACIAR Project FIS/2023/133 *Sustainable Hydropower in the Mekong: Focusing best-practice technological interventions into dam designs for sustainable fish-based livelihoods*.

Chris has received approval to run an expedited project development process to meet DFAT funding deadline. This is why we are sending you the FULL budget templates rather than preliminary. Chris has asked that you connect with him to discuss the process and ACIAR expectations.

We encourage you to read the design brief carefully as there has been additions since the concept note development. Eg, new additions under the Research Strategy section 3 (c) *Extent to which the social-economic dynamics of household adjacent the Xayaburi dam area changes since dam completion* and (d) *How have these changes, if any, manifest in material changes to their ability to engage in economic development?* which must be addressed in the project design.

Dulce has also asked whether there is scope for this project to include Cambodia in the knowledge brokering, capacity building, and policy engagement spaces that are being planned, given that there are at least 2 mainstem dams in Cambodia?

Please also note the following budget information:

ACIAR has updated the budget template so you may notice some changes since the last time you prepared a new budget.

The budget template is an Excel workbook, preconfigured for your project, with start & end dates in the **Project Budget Parameters** worksheet. Please enter your organisations name (and any other proposed collaborating institutions), abbreviation, role, and country on the **Project Budget Parameters** worksheet.

Only complete the peach coloured cells throughout the workbook. Please do not delete any worksheet, columns, rows or formula as this can lead to errors that link across the worksheets. If personnel need to be removed from any of the individual **collaborator worksheets**, please clear the contents of the row rather than deleting as this causes the **All Personnel** tab to break. Please note: The **All Personnel** tab populates automatically and does not require data entry.

The ACIAR Budget Guidelines and an example of a completed (Full Budget) template may be found on the ACIAR website [here](#).

If you have any queries, or would like clarification on any of the above, please don't hesitate to email or call me. I'm happy to help wherever possible.

I hope you have a great weekend and look forward to speaking with you soon.

Kind regards,

Lia Fraser

OFFICIAL

Dear Lee and Danielle,

I am pleased to inform you that the agreements for ACIAR Project FIS/2023/133 *Optimising fish passage at hydropower sites in the Mekong* have been fully signed and the **Project is now active**. A copy of the fully executed Research Agreement is attached to this email for your records.

Can you please forward a copy of the fully executed Collaboration Services Agreements when available.

CSU is now welcome to send through an invoice for [REDACTED] (ex. gst) for Payment 1.

[FOI Act
s. 47g](#)

Future project payments can be released from ACIAR once we have received an acquittal from the previous period and (when due) a project annual report.

[FOI Act
s. 47f](#)

All invoices and acquittals should be sent to [REDACTED] and also copied into me, [REDACTED]

Please see below table summarising the deliverables, due dates, and templates available for submission during the life of your Project, with further guidance underneath:

Deliverable	Due date	Template
Acquittal: Jan-Jun & Jul-Dec Annually	31 July & 31 January Annually	Please see link to the ACIAR website where you can download the required template along with instructions for you and your finance teams to follow.
Annual Reports	14 July Annually Projects: are required to submit Annual Reports if they have been active for more than 5 months on the 14 July.	Templates and instructions for these reports can be found on the ACIAR website . Publications list is mandatory.
Final Reports	Projects: within 60 days of the project ending	Templates and instructions for these reports can be found on the ACIAR website .

Travel Advice Notices (TANs): Prior to trips undertaken as part of your Project, you are required to submit a TAN. An online smart-form is available from the [ACIAR website](#). On submission of the TAN online, a notification will be sent to the RPM, myself, and the relevant country office.

Trip Reports: are required on your return from any trip undertaken as part of your Project. Trip reports should state the purpose of the trip and include information about activities, progress and problems/successes observed. Trip reports need to be submitted to the RPM and myself within 30 days following your return. As a guide, 1-3 pages is sufficient.

If you have any queries, or would like clarification on any of the above, please don't hesitate to email or call me. I'm happy to help wherever possible.

Kind regards,
Lia

Importance: High

FOI Act
s. 47f

OFFICIAL

Dear James,

As previously discussed, please find attached the full proposal that we have received from Lee. This document draws on the comments from the small group that reviewed the proposal (our version of peer review). Are you able to get back to us with consolidated inputs by Monday 2 October COB? We will need to get this proposal to the external reviewers after Lee has considered the additional inputs from DFAT. After the external review, Lee can finalise and then ACIAR can wrap up to be ready for the ROU.

About the project budget envelope, ACIAR's Executive approved an additional \$500k to our previous commitment of \$3.2m. This is also in consideration of DFAT's indication that it can increase its funding to \$2.3m. Given these, I can confirm that the budget envelope for FIS/2023/133 looks like this:

- ACIAR contribution: \$ 3.7 million
- DFAT contribution: \$ 2.3 million
- Total funding available: \$ 6 million

Please note that ACIAR has a management fee that is being taken into account in the budget. Also, ACIAR CBR is aware that the DFAT contribution will be paid out in full this FY2023/24, preferably by December 2023. We can work towards this as soon as we get the proposal finalised and the ROU confirmed.

Do let me know if you have questions or if you want to chat with our team about any other concerns.

Thank you and best regards,
Dulce

Dear Professor Evans

Variation No 3 relating to ACIAR Project FIS/2017/017

Assessing upstream fish migration measures at Xayaburi Dam in Lao PDR

On 21 February 2020 the Commonwealth of Australia represented by the Australian Centre for International Agricultural Research (ACIAR) and Charles Sturt University entered into Project Agreement for the provision of services as described in the Project Agreement. This Project Agreement was subsequently varied on 15 December 2022.

It has now been mutually agreed that the Project Agreement be varied as follows:

Scope of Variation

As a result of delays in completing project activities due to travel restrictions enforced to combat the viral pandemic of COVID-19 the completion date of the project will be extended by 13 months to 30 June 2024.

Services have been amended to both build upon the research done so far (by undertaking new research activities), co-design a critical second stage and to complete activities that were delayed by disruptions associated with COVID-19 during the first stage of the project. The financial limitation will increase by [REDACTED] to [REDACTED] GST exclusive to accommodate the research activities to build on research done so far.

FOI Act s.
47g

ACIAR, in accordance with Standard Conditions clauses 3 – Subcontracting and 10.12 – Intellectual Property provides approval for the inclusion of the subcontractor and the licensing of Project IP to the subcontractor.

The current project proposal including budget will be deleted and replaced by Annex A - Project Proposal (including budget) FIS/2017/017 v3.

The current Project Standard Conditions – Bilateral December 2021 are the most up to date version and will not change.

All other provisions and conditions of the Project Agreement shall remain as they are.

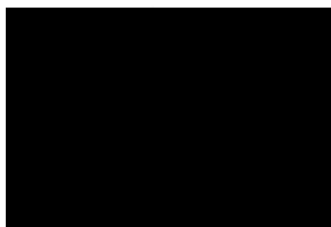

Would you please confirm your acceptance of the above variation to the Project Agreement by signing the duplicate of this letter and returning it to ACIAR. This variation will be effective from date of signing.

FOI Act s.
47f

Hello Julia/Ann,

Many thanks for the budget template.

Have now completed and am pleased to submit along with the draft Phase 1 document. I have included the three year budget and, assuming smooth passage through subsequent IHR's from here, we hope the main project can transition smoothly from the SRA and commence in August 2019. As discussed, considering this project has been scoped for some time, and the majority of funds are coming from DFAT, the budget looks more like a Phase 2 than Phase 1. Hope this is OK.

Ann: Based on the November IHR experience I substantially revised this Phase 1. It seems that IHR indeed wanted more clarity/detail on methods, detailed workplans, analyses etc, so these are included in the attached (subsequently, it is closer to a Phase 2 than a Phase 1). I have stepped through the planned work in a methodical sense, showing linkages among activities and placed it into a broader regional strategic sense. I hope this is all OK and makes sense and is consistent with our original intent (SRA followed by main project).

Chris/Ann: Do we need to get DFAT sign off on this? Or is this already implied with the existing MOU and agreement b/w ACIAR/DFAT?

Incidentally, after missing the start, the SRA is now proceeding extremely well and if needed, we can explore progress with XPCL, KarlTek LARReC and NUOL staff next week, as all will be in Albury for the conference.

Please let me know if any changes are needed in prep for IHR.

Thanks again for ACIAR's support for this work. It is an important evolution of the fish passage program and certainly exciting to be working at a large dam with so much international interest and scrutiny.

Many thanks,
Lee

Subject: FIS/2017/017 - Budget Template

FOI Act
s. 47f

Hi Lee,

Attached is the configured draft budget for you to complete, and return by 6 December. Also included below are some basic instructions for completing the spreadsheet. As always, any hassles please let me know.

Points to note in preparing the budget:

- The peach coloured cells are for you to complete. (Except for the Costs Calculator tab – here you enter details in the white cells);
- In the preliminary phase we schedule one payment per year, then split it into the usual two six-monthly payments once the project has passed through the initial In house review process;
- There is one tab per institution for project personnel – these are labelled with the institution names. Enter the Names, role, salary and percentage of time - the formulas will split it out across the years and feed into the full budget expenditure tab. If names are not yet known, a TBC in the name/position is fine at this point. You will also need to add in estimated days in country;
- In the cost calculator we need a breakdown of research operating costs, capital and travel per institution. This is linked to the totals in the full budget expenditure tab. The best way to approach this is to enter your cost breakdown for each category in rows 2 and below first. This will sum to row 1 (unspecified costs) and when all costs are entered you can transfer the totals to the Full Budget Expenditure tab. (I hope this is clear!) Rows can be unhidden if you need extra;
- Infrastructure: percentages maximum of 13% (Comm Org) and or 5% (collaborator);
- On-costs: not in excess of 28% for Australian institutions, if so we need it itemised (e.g. 13% superannuation, long service leave 1% etc.);
- Annual salary uplift: should be (approximately) in line with inflation (maximum 2% unless you can provide workplace agreement); and
- Finally, please don't delete any rows or columns as this will mess up formulas!!

Kind regards,
Julia

Hello Ann and Julia,

Thanks for your support with the variation documentation for FIS/2017/017.

Attached are the modified project proposal document and budget in line with the approved variation.

These amount to:

1. Add Wayne Robinson to the project (0.2 FTE) for 12 months
2. Increasing NUOL and LARReC staff and travel time during the Covid period
3. Adding Darren Grigg to help shoot some instructional videos
4. Have also added 3 months to the final report submission date (just to offset any delays which might accrue from this year)

Have also made some minor changes to staffing (to reflect team changes) and updated the intellectual property register.

Hope this is all OK. Please give me a call if you have any questions.
Thanks, as always, for your support.

Regards,
Lee

Subject: Fwd Variation documents for FIS-2017-017 [SEC=UNCLASSIFIED]

FOI Act s.
47f

Dear Lee,

Please find attached the project proposal and budget (renamed with V1) for you to update with all the relevant changes clearly marked.

Please only use yellow to highlight all additions in yellow, strikethrough for all deletions (~~like this~~), and do not use track changes.

Please also check over the Intellectual Property Register and make changes as necessary (also using highlight and strikethrough), ensuring that the date of assessment is updated and highlighted also.

Any changes to the budget should also be highlighted in yellow and can only occur after the Jan-Jun 2020 payment period (some minor changes have already been made to the Payment schedule tab of the spreadsheet).

Once all the changes have been made, please return it to me and Ann & I will check through and then proceed with the variation. This will be done via a Letter of Variation to CSU.

As with FIS/2014/041, once we receive a signed copy of the LoV we will draft an Exchange of Letter Variation (EoLV) for the international collaborators for advice and signature. Please let me know if you have any questions.

Kind regards,

Julia

[FOI Act s. 47f](#)

Thanks Ann. That is wonderful news. Thanks, as always, for your support.

It is perfectly timed as XPCL has formally approved Wayne to travel to site this year to keep the fieldwork going. So things are looking good in that regard. Also, Wayne has managed to keep the fieldwork on track at Pak Peung and Savannakhet.

We are VERY lucky that he was able to stay on despite the border closures. Madame Khampheng has been fantastic at organising government approval for him to move freely.

Myanmar is proving a challenge; and the six month extension to 041 will help the work over the line.

Julia: Quick qn.....when the 2014/041 project gains a time extension, will ACIAR send a letter informing the partners? (i.e. Myanmar DOF, NUOL and LARReC) or is that the responsibility of CSU?

Great end to the week! Hope you both have a nice long weekend.

Many thanks

Thanks Ann. Sorry, I should have clarified. Yes, there are some travel savings and these were factored in.

Within the budget; project-related field travel from Australia-Laos was being covered by CSU as a cash contribution rather than being funded by ACIAR. CSU contributed cash cannot be carried over into subsequent financial years. So this was factored in but cannot contribute a significant saving.

All travel for NUOL and LARReC is funded by ACIAR intended to proceed as planned as domestic trips (the additional trips requested were to cover the non-ability of CSU staff to travel).

The ACIAR-funded travel all relates to the project governance committee (which included return airfares for three members). The committee was due to meet in Laos next week. Unfortunately that won't be possible now. But, if possible, it will be preferable to hold those funds so that we can catch up on the on-site visits in subsequent years and maintain the important work of the committee.

Hope that clarifies things.

Thanks,

Lee

Hi Lee,

Regarding your request for a financial variation for FIS-2017-017 for [REDACTED], CIAR would like more clarity about the likely savings made from the impacts on travel restrictions, which must be quite substantial, and how these have been factored into the costed variation request.
