Adelaide

Program

Agribusiness

Project code

AGB/2018/121

**specifically mainstreams
contemporary gender equity, social
inclusion and women's economic
empowerment principles and
approaches.**

This project reviewed, updated and developed innovative new content, learning resources and delivery models for the "Making Value Chains Work Better for the Poor" Toolbook (M4P) and the ACIAR Agribusiness Master Class (AMC). There was a focus on mainstreaming and integrating contemporary gender equity, social inclusion and women's economic empowerment principles and approaches. The project also explored more sustainable delivery models that integrate contemporary remote and on-line learning approaches and technologies. A community of practice was established, whilst opportunities for enhancing private sector engagement were explored.

The project also contributed towards a wider goal of building capacity in agribusiness research-for-development methods of young researchers, development specialists and innovative agribusiness operators.

Overview

**This project aimed to develop
innovative agribusiness research
learning resources and delivery
models for the Asia Pacific that**

Project outcomes

- Reviewing and updating the M4P Value Chain Toolbook and case studies.
- Reviewing and improving the content, format and delivery of the Agribusiness Master Classes.

- Developing a community of practice and exploring business models for delivery of M4P Value Chain Toolbook and Agribusiness Master Class program throughout the Asia-Pacific.
