Agribusiness

### Project code

AGB/2019/100

the different plausible pathways by which outputs of research and use of technology will lead to outcomes and impact on the ground to improve smallholder livelihoods and develop their communities.

This project was part of a scoping exercise that informs on inclusive value chains in order to maximise effectiveness and impact.

Substantial emphasis was placed on engagement and participation of the Philippine Council for Agriculture, Aquatic and Natural Resources Research and Development Sector managers, particularly in agribusiness and leadership capability development, and the analysis and identification of opportunities where agribusiness development could lead to inclusive impacts at scale.

## Project outcomes

- Identified examples of current inclusive agribusiness initiatives, and described the approaches applied and stakeholders involved.
- Engaged stakeholders in inclusive agribusiness initiatives in the identification of effective pathways and suitable partners for a future inclusive value chains project
- Co-developed a theory of change for project AGB/2018/196 on inclusive value chains.

## Overview

This project aimed to develop a theory of change for inclusive agribusiness models for market-oriented value chains in the Philippines.

The focus of this project was to bring together inclusive business models and community development to map
